Welcome to the 7th Workshop on Lung Health

Dear Colleagues & Friends,

We are glad to welcome you to the 7th International Workshop on Lung Health, hosted in the marvellous city of Prague from January 16th to January 18th, 2020.

Once again we would like to thank you for your attendance: your contribution will be the key value for a successful meeting, where – as per the Workshop tradition – interaction with World Experts, small group learnings and new approaches to the hot topics of the respiratory medicine, are the milestones.

The silver thread of the 7th edition is “Rethinking Lung Diseases: towards tailored management”; the Scientific Programme – beside the traditional themes of our field – will also focus on emerging and extremely important topics such as NTM, Biologicals, Bronchiecasis, Digital Medicine and CF in Adults.

Acquiring new knowledge, learning new approaches and discovering new insights to be applied immediately in the daily clinical practice as soon as back at work, are the most important aims of the 3 working days in Prague.

We look forward to exchanging knowledges and opinions, thanks also to the Pros and Cons Session and the Radiological Ground Round where your real life experiences could bring crucial added values to the meeting outcomes.

A special welcome to all the young researchers and clinicians, wishing them a constructive meeting with the Future Leaders Mentoring Programme, the Rising Stars Session and the Poster Strolling Session. All these activities are extremely important for the young generation as well as for the senior representatives, to develop a constructive dialogue and cultural melting pot.

A final thanks to all the Endorsing Societies, Associations and to our Sponsors, which have renovated the support to the International Workshop on Lung Health, a family and traditional meeting where science and research progress are our shared and indispensable values.

Welcome to Prague, Welcome to the 7th International Workshop on Lung Health.

Yours Sincerely,

F. Blasi  G.W. Canonica  S. Centanni  J. C. Virchow  T. Welte
