PCO-Organising Secretariat

WELCOME TO THE XI INTERNATIONAL WORKSHOP ON LUNG HEALTH NEW SCENARIOS

Dear Colleagues,

We are honoured to invite you to the **XI Edition of the International Workshop on Lung Health**, taking place – from January 18 to January 20, 2024 - in the amazing frame of Seville (Spain), with its marvellous background of culture and history, combined with the opening tension to future challenges. The **fil rouge** of the XI International Workshop on Lung Health has been defined: **“New Scenarios”** is the main theme which embraces sessions, lectures, and symposia. In the last year and half, in the post-COVID era, many interesting news, opportunities and challenges crossed the door of the respiratory world.

During the 3 Workshop days we would face all the major and outbreaking topics of Respiratory Medicine: from **Asthma and COPD** to **Respiratory Infections**, reaching also the **Interstitial and Rare Diseases**, focusing on the most recent **updates and perspectives**, in terms of **clinical advances** and **research outcomes**.

More time will be devoted to discussion, interaction, and contribution from the audience with the reconfirmation of the following formats:

- **The Rising Stars Programme** will give the opportunity to young clinicians and researchers worldwide to present their valuable work for the first time in front of an international audience and get suggestions from the faculty members.
- **The Future Health Leaders Mentoring Programme (FuHeL)** will welcome 10 – 12 selected early carrier researchers and clinicians who will be accompanied during the whole congress experience on a “career mentoring” by 3 mentors of excellence.
- **Abstract Calls and on-site sessions discussion** will give the opportunity to attendees to share projects and results of the most recent crucial world challenges in the Respiratory and related fields.

Due to the emerging news and updates focused on Respiratory Rare Diseases, we retain of crucial relevance to stimulate especially young researchers and clinicians to present original scientific paper on these areas. An **Oral Communication Session** on Saturday Morning will be focused on the mentioned theme.

We invite you all to contribute to the success of the next IWLH edition, submitting papers to the Workshop Calls, sending any kind of suggestions and inputs and – of course – joining us in Seville!

Sincerely,

Organising Committee

ORGANISING ASSOCIATION

The **Association Internationale pour la promotion de Formations Spécialisées en Médecine et en Science Biologique** (AFISM) is an international association devoted to promoting and enhance the continuing professional development and post-degree education in medical, scientific, and technical professions. AFISM organises high level education events, practical workshops, debates, consensus conferences and international congresses to help specialists to keep themselves up to date with all the new and quick advancements in the different disciplines.

Encouraging networking among professionals, AFISM is also focused on strongly supporting the sharing of evidence-based knowledge and discourages the diffusion of practices which are not supported by evidence to limit the circulation of harmful fake news still maintaining an open dialogue with all the different actors.
